# INANCE INC. 3 PROFILE

**User Manual** 

Model ID: MAVERICKFORCE3PROFILE

# **Edition Notes**

The Maverick Force 3 Profile User Manual includes a description, safety precautions, installation, programming, operation, and maintenance instructions for the Maverick Force 3 Profile as of the release date of this edition.

# **Trademarks**

# Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

# **Document Printing**

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

# **Intended Audience**

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

# Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage, or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident, or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions.

# 1. Before You Begin

# What Is Included

- Maverick Force 3 Profile
- Seetronic Powerkon IP65 power cable
- 2 Omega brackets with mounting hardware
- Quick Reference Guide

# **Claims**

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate the claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

# **Text Conventions**

| Convention   | Meaning   |  |  |  |
|--|---|--|--|--|
| 1-512  | A range of values                               |  |  |  |
| 50/60  | A set of values of which only one can be chosen |  |  |  |
| Settings   | ettings A menu option not to be modified        |  |  |  |
| <enter> A key to be pressed on the product's control panel</enter> |   |  |  |  |

# **Symbols**

| Symbol     | Meaning   |
|------------|---|
| <u> </u>   | Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator. |
| <b>(i)</b> | Important installation or configuration information. The product may not function correctly if this information is not used.  |
|            | Useful information.   |

The term "DMX" used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

- The product has XLR sockets for DMX input and output.
- Notice: This control circuit is isolated and belongs to the Class 2 data port.

The control circuit has a cumulative leakage current of less than 3.5 mA.

# **Safety Notes**

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

- The luminaire is intended for professional use only.
- The luminaire should be positioned so that prolonged staring into the luminaire at a distance closer than 48.9 ft (14.9 m) is not expected.
- If the external flexible cable or cord of this luminaire is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or its service agent.
- The light source contained in this luminaire shall only be replaced by the manufacturer or its service agent or a similar qualified person.

### CAUTION:

- This product's housing may be hot when operating. Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- When transferring the product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow the product to fully acclimate to the surrounding environment before connecting it to power.
- Flashing light is known to trigger epileptic seizures. User must comply with local laws regarding notification of strobe use.

### ALWAYS:

- Disconnect from power before cleaning the product or replacing the fuse.
- Replace the fuse with the same type and rating.
- Use a safety cable when mounting this product overhead.
- Connect this product to a grounded and protected circuit.

### DO NOT:

- Open this product. It contains no user-serviceable parts.
- Look at the light source when the product is on.
- Leave any flammable material within 20 cm of this product while operating or connected to power.
- Connect this product to a dimmer or rheostat.
- Operate this product if the housing, lenses, or cables appear damaged.
- Operate this product outdoors or in any location where dust, excessive heat, water, or humidity may affect it (adhere to standards for the published IP rating).
- ONLY use the handles or the hanging/mounting brackets to carry this product.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- In the event of a serious operating problem, stop using immediately.

If a Chauvet product requires service, contact Chauvet Technical Support.

# **FCC Statement of Compliance**

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

# RF Exposure Warning for North America and Australia

**Warning!** This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and the user. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

# **Expected LED Lifespan**

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

# 2. Introduction

# **Description**

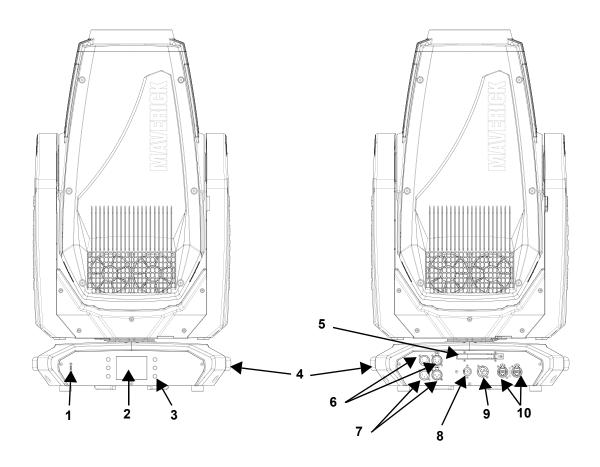

The Maverick Force 3 Profile is a lightweight, tour-grade moving head that features an output of over 40,000 lumens and a myriad of speedy effects. The Maverick Force 3 Profile features CMY + CTO color-mixing, a color wheel, 2 stackable gobo wheels, and a zoom range of 5° to over 50° that maintains a flat field of focus even when fully wide. A custom-built framing system containing 4 dual axis shutters with a 120° field of rotation, motorized iris, focus, zoom, and frost capabilities, alongside two 5-facet rotating prisms give an abundance of tools for beam shaping. Control as desired with DMX, sACN, Art-Net, or WDMX.

### **Features**

- Full-featured 915 W LED yoke profile fixture, including CMY+CTO color mixing, a four blade framing shutter system with rotation, a color wheel, a CRI filter, animation wheel, a 10:1 zoom, two independently layerable prisms, two frosts, and a static and a rotating gobo wheel
- 16-bit dimming of master dimmer for smooth control of fades
- Variable CMY + CTO color mixing system to create a wide pallet of colors
- CRI and CTB filters on color wheel for added flexibility
- · Independently layerable five-facet linear and five-facet round prisms for increased prism options
- One rotating and one static gobo wheel for dynamic texture possibilities
- Independent light and medium frosts for beam control
- + or 60° rotation framing shutter system to allow for better framing positioning.
- Animation wheel for enhanced visual effects
- Iris for total beam control
- · DMX, WDMX, sACN, and Art-Net for full flexibility of control options
- RDM control over DMX for fixture reporting
- 4.9° to 53.9° zoom angle for variable beam sizes
- Three menu presets and preset cross load for decreased shop setup time
- TRUE1-compatible power input
- USB slot for software uploads
- Battery backup display with auto-rotate depending on fixture orientation.
- Fail-safe Ethernet connectivity allows for data to pass even if fixture power is lost.

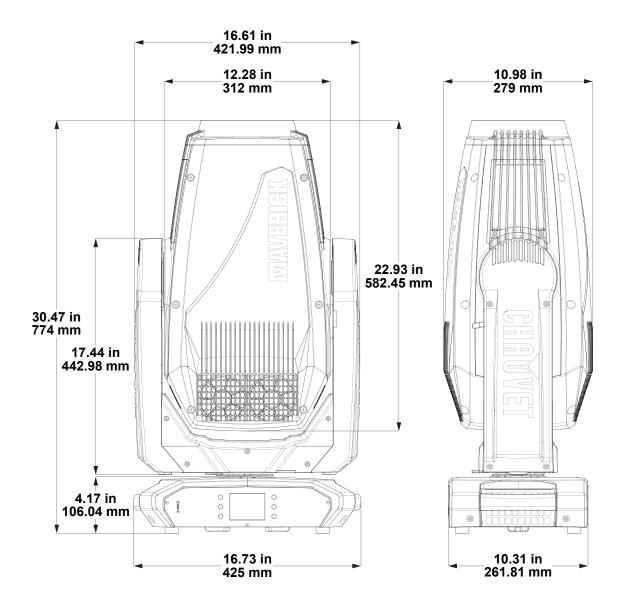

# **Product Overview**

| # | Name          | #  | Name             |
|---|---------------|----|------------------|
| 1 | USB-C port    | 6  | 5-pin DMX in/out |
| 2 | LCD display   | 7  | 3-pin DMX in/out |
| 3 | Menu buttons  | 8  | Fuse holder      |
| 4 | Carry handles | 9  | Power in         |
| 5 | Antenna       | 10 | Ethernet ports   |

# **Product Dimensions**

# 3. Setup

# **AC Power**

The Maverick Force 3 Profile has an auto-ranging power supply and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart. The listed current rating indicates the product's average current draw under normal conditions.

- Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

# **AC Plug**

The Maverick Force 3 Profile comes with a power input cable terminated with a Seetronic Powerkon A connector on one end and an Edison plug on the other end (U.S. market). If the cable has no plug or it is necessary to change the plug, use the table below to wire a plug.

| Connection | Connection Wire (U.S.) |              | Screw Color     |  |
|------------|------------------------|--------------|-----------------|--|
| AC Live    | Black                  | Brown        | Yellow or Brass |  |
| AC Neutral | White                  | Blue         | Silver          |  |
| AC Ground  | Green/Yellow           | Green/Yellow | Green           |  |

# **Fuse Replacement**

- 1. Disconnect this product from the power outlet.
- 2. Using a flat-head screwdriver, unscrew the fuse holder cap from the housing.
- 3. Remove the blown fuse and replace with another fuse of the same type and rating (F 20 A, 250 V).
- 4. Screw the fuse holder cap back in place and reconnect power.

# **Signal Connections**

The Maverick Force 3 Profile can receive a DMX, Art-Net<sup>™</sup>, or sACN, signal. The Maverick Force 3 Profile has two Amphenol XLRnet through ports, and both 3-pin and 5-pin DMX in and out ports. If using other compatible products with this product, it is possible to control each individually with a single controller.

### **Control Personalities**

The Maverick Force 3 Profile uses a 3-pin or 5-pin DMX data connection, WDMX, Art-Net™, or sACN for its two control personalities: **Dmx Mode 37 CH** and **Dmx Mode 53 CH**.

- Refer to the <u>Operation</u> chapter to learn how to configure the Maverick Force 3 Profile to work in these personalities.
- The <u>Control Channel Assignments and Values</u> section provides detailed information regarding the control personalities.

For more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: <a href="https://www.chauvetprofessional.com">www.chauvetprofessional.com</a>.

# DMX Linking

The Maverick Force 3 Profile can link to a DMX controller using a 3-pin or 5-pin DMX connection or a WDMX connection. For more information about DMX, read the DMX primer at: <a href="https://www.chauvetprofessional.com/wp-content/uploads/2016/06/DMX">https://www.chauvetprofessional.com/wp-content/uploads/2016/06/DMX</a> Primer.pdf.

# Remote Device Management

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer as not all DMX controllers have this capability. The Maverick Force 3 Profile supports RDM protocol that allows feedback to make changes to menu map options.

# Art-Net™ Connection

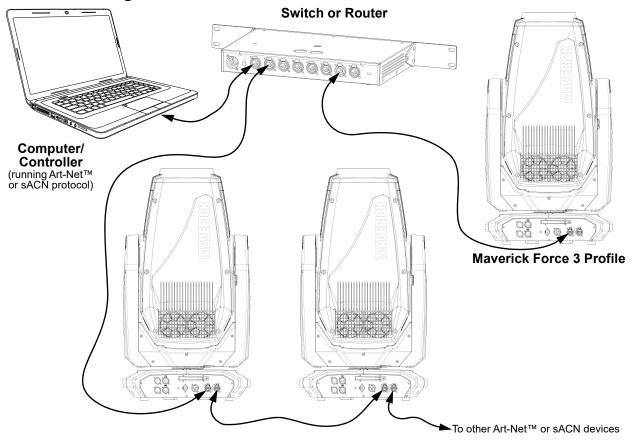

Art-Net™ is an Ethernet protocol that uses TCP/IP that transfers a large amount of DMX512 data using an Amphenol XLRnet RJ45 connection over a large network. An Art-Net™ protocol document is available from <a href="https://www.chauvetprofessional.com">www.chauvetprofessional.com</a>.

Art-Net™ designed by and copyright Artistic Licence Holdings Ltd.

# **sACN** Connection

Streaming ACN (Architecture for Control Networks), also known as ANSI E1.31, is an Ethernet protocol that uses the layering and formatting of ACN to transport DMX512 data over IP or any other ACN-compatible network.

# Connection Diagram

# **USB Software Update**

The Maverick Force 3 Profile allows for software updates with a USB device using the built-in USB port. To update the software using a USB flash drive, do the following:

- 1. Power on the product, and plug the flash drive into the USB port.
- Once the flash drive has been detected, the message "USB UPDATE" will be displayed. Select YES.
- The next screen will show the software versions available for this fixture on the USB drive. For
  multiple versions of the software for the same fixture, use <UP> or <DOWN> to select the desired
  version. Press <ENTER>.
- 4. The "USB UPDATE" screen will re-appear. Select YES.

It is possible to update multiple units with the USB if they are daisy chained via DMX.

- 5. The update will start. **DO NOT** turn off the power or disconnect the USB while the USB LED is still blinking during the process. The screen display will read: "**USB Update Wait**". The update can take several minutes to complete.
  - When the USB firmware is done uploading, in some fixtures, the display will change to: "DO NOT UNPLUG, UPDATING".
- 6. When the update is completed, the fixture will automatically reboot.
- 7. Go to Fixture Information on the product's menu map and confirm the firmware revision.
- 8. When the boot-up process is finished, restart the product.

- Place the .chl file in the root directory of the USB drive.
- The product's USB port supports up to 32GB capacity and only works with FAT32 file format.

Turning off the power or removing the USB while the USB LED is still blinking during the update will cause partial or total firmware failure in the targeted fixture(s). If this occurs, the user will need the UPLOAD 08 device to fix this. Please contact Chauvet regarding this device.

# Mounting

Before mounting the product, read and follow the safety recommendations indicated in the <u>Safety Notes</u>. For our Chauvet Professional line of mounting clamps, go to <a href="https://trusst.com/products/">https://trusst.com/products/</a>.

### Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

# Rigging

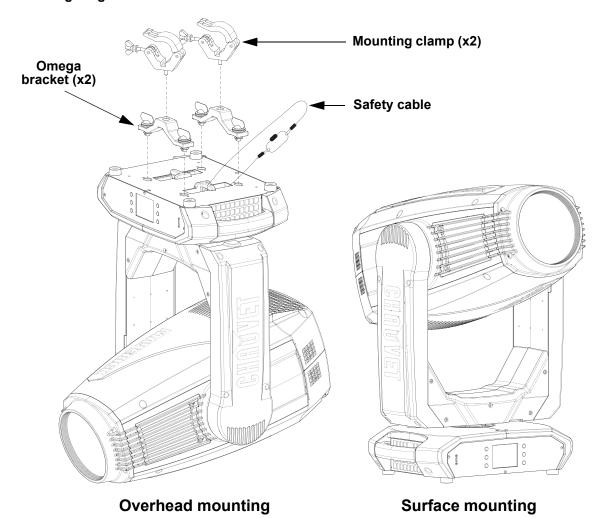

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure and attachment points can support the weight before hanging the product (see the <u>Technical Specifications</u> for weight information).
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.

### **Procedure**

The Maverick Force 3 Profile comes with 2 Omega brackets to which the user can directly attach mounting clamps (sold separately). Make sure the clamps are capable of supporting the weight of this product. Use at least two mounting points per product. For the Chauvet Professional line of mounting clamps, go to <a href="http://www.trusst.com/products">http://www.trusst.com/products</a>.

# **Mounting Diagram**

# 4. Operation

# **Touchscreen Control Panel**

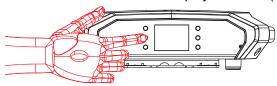

The Maverick Force 3 Profile has a touchscreen display as well as 6 control buttons. Navigate the menu structure by pressing the buttons, touching the images of the buttons on the sides of the display, or touching the desired menu option on the display directly. The touchscreen can be locked and calibrated through the Setup options in the menu. (See <u>Touchscreen Calibration</u> and <u>Touchscreen Lock</u>.)

# **Control Panel Description**

| Button        | Name            | Function  |  |  |  |  |  |  |

# **Battery Powered Display**

The Maverick Force 3 Profile has a battery powered display which enables access to the menu when the product is powered off. Press and hold **MENU>** until the display activates (approximately 15 seconds).

# **Home Screen**

The Maverick Force 3 Profile has a home screen that shows the current control protocols, personalities, starting addresses, IP addresses, and universes. To see the home screen, press **<MENU>** repeatedly until it shows on the display. From the home screen, touch any of the displayed control settings to immediately jump to that part of the menu, such as the personality, starting address, or universe, or press **<ENTER>** to reach the main menu.

### **Control Panel Lock**

The setting locks or unlocks the control panel.

- 1. Go to the **Settings** main level.
- 2. Select the Lock Screen option.
- 3. Select **NO** (control panel stays unlocked) or **YES** (locks control panel).

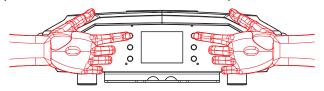

When the control panel lock is activated, the product will prompt for the passcode in order to access the menu. Enter the passcode as described below.

### **Passcode**

After being prompted to enter the passcode, enter the numbers 0920.

### Technician Mode

The technician mode disables the pan/tilt motors, allowing the output of the product to be aimed by hand. To enable the technician mode of the Maverick Force 3 Profile, hold **<UP>** and **<LEFT>** while the product is powering on. When the product is turned off and back on, the pan and tilt will return to normal function.

# Menu Map

Refer to the Maverick Force 3 Profile product page on <a href="https://www.chauvetprofessional.com">www.chauvetprofessional.com</a> for the latest software and menu map.

# **Control Configuration**

Use control configurations to operate the product with a DMX, Art-Net™, or sACN controller.

### **Control Mode**

The Maverick Force 3 Profile works with wired DMX, WDMX, Art-Net™, and sACN control signals. To select which protocol to use:

- 1. Go to the **Settings** main level.
- 2. Select the Control Mode option.
- 3. Select the desired protocol, from DMX, ArtNet, sACN, or WDMX.

### Control Personalities

To set the control personality:

- 1. Go to the **Personality** main level.
- 2. Select the desired personality, from **Dmx Mode 37 CH** or **Dmx Mode 53 CH**.

- See the <u>Starting Address</u> section for the highest selectable starting address for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

# **Starting Address**

Each product will respond to a unique starting address from the controller. All products with the same starting address will respond in unison. To set the starting address:

- 1. Go to the Address main level.
- 2. Select the starting address (001-512).
  - The highest recommended starting address for Dmx Mode 37 CH is 476.
  - The highest recommended starting address for Dmx Mode 53 CH is 460.

# **Network Setup**

The Network Setup settings control the IP address, subnet mask, and universe of the product.

### IP Mode

To choose how the IP address is set:

- 1. Go to the **Network Setup** main level.
- 2. Select the IP Mode option.
- 3. Select the desired IP mode, from **Manual** (to set a custom IP address), **DHCP** (the IP address is assigned by the connected network), or **Static** (the product uses a default, preset IP address).

# Universe

To assign an Art-Net™ or sACN universe to the Maverick Force 3 Profile:

- 1. Go to the **Network Setup** main level.
- 2. Select the **Universe** option.
- Set the universe, from 000–255 (for Art-Net<sup>™</sup>) or from 001–256 (for sACN).

### Manual IP Address

To set the IP address when the IP Mode is set to Manual:

- 1. Go to the **Network Setup** main level.
- 2. Select the **Ip** option.
- 3. Set the 4 values of the IP address from 000-255.

# **Subnet Mask**

To set the subnet mask:

- 1. Go to the **Network Setup** main level.
- 2. Select the SubMask option.
- 3. Set the 4 values of the subnet mask from **000–255**.

# **Gobo Wheels**

# **Gobo Dimensions**

# **Gobo Replacement**

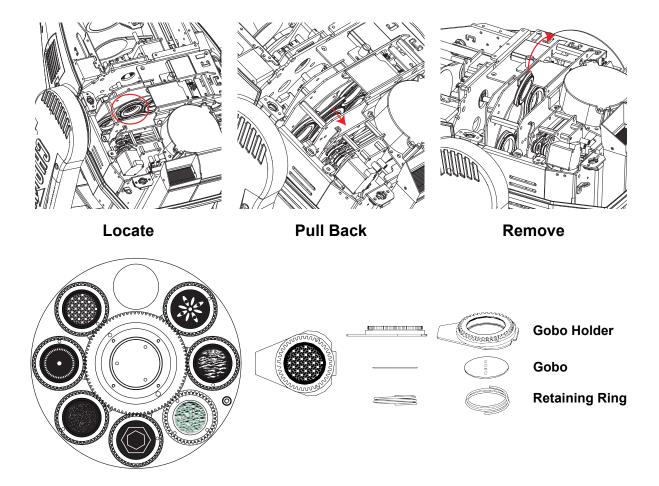

The gobos in gobo wheel 1 are removable from their gobo holders. This operation is quite simple, although it requires the technician to carefully follow the recommended procedure.

- Make sure to disconnect the product's power cable before replacing a gobo.
- Always replace a gobo with a gobo of the same dimensions.
- When inserting a glass gobo, always make sure that the shiny side of the gobo (glass base) faces the lamp. This provides a layer of protection against the high temperature from the lamp.

### **Procedure**

- 1. Turn the product off and disconnect it from the power outlet.
- 2. Open the head cover by loosening the screws on the top cover.
- 3. Separate the gobo holder away from the gobo wheel by pushing it toward the front of the moving head (direction 1 in the diagram). Be careful not to push the gobo out of the gobo holder.
- 4. Extract the gobo holder by pulling it outward (direction 2 in the diagram).
- 5. On a flat surface, remove the expansion ring that holds the gobo in place and remove the gobo from the gobo holder.
- 6. Insert a new gobo and hold it in place with the expansion ring.
- 7. Slide the tip of the gobo holder under the pressure plate near the center of the gobo wheel.
- 8. Push the gobo holder inwards. DO NOT force the gobo holder into the gobo wheel slot. If correctly installed, the gobo holder should easily slide into the gobo wheel slot.

### Diagram

- Gobo illustrations are for reference purposes only. Gobo designs may differ from those installed in the product.
- See Gobo Maintenance for instructions on how to clean the gobos and gobo holder.

# **Settings Configuration**

# Pan Reverse

To set the orientation of the pan:

- 1. Go to the **Settings** main level.
- 2. Select the Pan Reverse option.
- 3. Select from **NO** (normal pan motion), or **YES** (reversed pan motion).

# **Tilt Reverse**

To set the orientation of the tilt:

- 1. Go to the **Settings** main level.
- 2. Select the **Tilt Reverse** option.
- 3. Select from **NO** (normal tilt motion), or **YES** (reversed tilt motion).

### Screen Reverse

To set the orientation of the display:

- 1. Go to the **Settings** main level.
- 2. Select the Screen Reverse option.
- 3. Select from NO (right-side up), YES (upside-down), or AUTO (automatic orientation).

# Pan Angle

To set the maximum angle of the pan:

- 1. Go to the **Settings** main level.
- 2. Select the Pan Angle option.
- 3. Select from **540** (540°), **360** (360°), or **180** (180°).

# Tilt Angle

To set the maximum angle of the tilt:

- 1. Go to the **Settings** main level.
- 2. Select the **Tilt Angle** option.
- 3. Select from **270** (260°), **180** (180°), or **090** (90°).

# **Black out on Movement**

To set the product to black out while the pan/tilt, color wheel, or gobo wheels are moving:

- 1. Go to the **Settings** main level.
- 2. Select from the BL. O. P/T Move (black out on pan/tilt movement), BL. O. ColorMove (black out on color wheel movement), or BL. O. GoboMove (black out on gobo wheel movement) options.
- 3. Select from **NO** or **YES**.

# **Touchscreen Calibration**

To calibrate the touchscreen:

- 1. Go to the **Settings** main level.
- 2. Select the **Calibration** option.
- 3. Select from NO (cancel), or YES (calibrate).
- 4. Follow the instructions on the display.

### Touchscreen Lock

To lock the touchscreen and limit the display to operation by the menu buttons:

- 1. Go to the **Settings** main level.
- 2. Select the Touchscreen Lock option.
- 3. Select from **NO** (do not lock the touchscreen), or **YES** (lock the touchscreen).

### Swap Pan and Tilt

To swap the controls for the pan and tilt:

- 1. Go to the **Settings** main level.
- 2. Select the Swap XY option.
- 3. Select from NO (pan controls pan, tilt controls tilt) or YES (pan controls tilt, tilt controls pan).

### **WDMX** Reset

To reset the WDMX connection:

- 1. Go to the **Settings** main level.
- 2. Select the WDMX Reset option.
- 3. Select from NO or YES.

# **Display Backlight Timer**

To set how long before an inactive display will turn off:

- 1. Go to the **Settings** main level.
- 2. Select the **Backlight Timer** option.
- 3. Select the length of the backlight timer, from **30S** (30 seconds), **1M** (1 minute), **5M** (5 minutes), or **ON** (always on).

### Loss of Data

To select how the product will respond to a loss of the control signal:

- 1. Go to the **Settings** main level.
- 2. Select the Loss of Data option.
- 3. Select from Hold (holds last signal received) or Close (blacks out fixture).

### Fan Mode

To set the fan speed mode:

- 1. Go to the **Settings** main level.
- 2. Select the Fans option.
- Select the fan mode, from Auto (fan speed adjusts to product temperature), Full (fan speed at maximum), ECO (quiet mode), TV25 (maintains a consistent LED output up to an ambient temperature of 77 °F [25 °C]), or TV35 (maintains a consistent LED output up to an ambient temperature of 95 °F [35 °C]).

When using the fan modes TV25 or TV35, please set the PWM Options to 6000Hz or 15000Hz to prevent any possible harmonization noise.

### **Dimmer Curve**

To set the dimmer curve:

- 1. Go to the **Settings** main level.
- 2. Select the **Dimmer Curve** option.
- 3. Select the dimmer curve, from Linear, Square, I Squa, SCurve or Linear2.

# **Pulse Width Modulation**

To adjust the frequency of the pulse width modulation:

- 1. Go to the **Settings** main level.
- 2. Select the PWM Option option.
- 3. Select the frequency, from 600Hz, 1200Hz, 2000Hz, 4000Hz, 6000Hz, or 15000Hz.

# **LED Power**

To set the maximum power of the LED output:

- 1. Go to the **Settings** main level.
- 2. Select the LED POWER option.
- 3. Set the power from **064–255**.

### **Minimum Zoom Focus**

To enable or disable the minimum zoom focus function:

- 1. Go to the **Settings** main level.
- 2. Select the **Min Zoom Focus** option.
- 3. Select **NO** (manual independent zoom control) or **YES** (focus adjusts depending on zoom setting).

# **Preset Selection**

To select a preset configuration of menu options:

- 1. Go to the **Settings** main level.
- 2. Select the **Preset Select** option.
- 3. Select from PRESET A (default), PRESET B, or PRESET C.

- Changes to settings automatically save to the currently selected Preset.
- If no Preset has been selected, changes to settings save to PRESET A.
- After selecting a Preset, the product will restart.

# **Preset Synchronization**

To transfer saved Presets from one Maverick Force 3 Profile to another:

- 1. Connect the Maverick Force 3 Profile products to receive the Presets by a DMX daisy chain.
- 2. Make the Maverick Force 3 Profile with the Presets to transfer the first in the DMX daisy chain.
- 3. Power on all of the products.
- 4. Set all of the products to a Control Mode other than WDMX (DMX, ArtNet, or sACN).
- 5. On the Maverick Force 3 Profile with the Presets, go to the **Settings** main level.
- 6. Select the Preset Sync option.
- 7. Select **NO** (to cancel) or **YES** (to transfer the Presets to the connected products).

- All menu configurations are transferred except for the IP address.
- ONLY connect Maverick Force 3 Profile products for this function!

# **USB** Update

To enable or disable software update using USB:

- 1. Go to the **Settings** main level.
- 2. Select the **USB Update** option.
- Select NO (disables software update through USB) or YES (enables software update through USB).

See the <u>Signal Connections</u> section for the detailed instructions on how to update the Maverick Force 3 Profile software using a USB C connection.

### Reset Function

To reset specific functions or the entire product:

- 1. Go to the **Settings** main level.
- 2. Select the **Reset Function** option.
- 3. Select the functions to reset, from Pan/Tilt, IrisPrism, Color/CMY/Blade, Gobo/Gobo Rotate, Frost/Animation, or All.
- 4. Select **NO** (to cancel) or **YES** (to reset the selected functions).

# **Factory Reset**

To reset the product to factory settings:

- 1. Go to the **Settings** main level.
- 2. Select the Factory Settings option.
- 3. Select **NO** (to cancel) or **YES** (to reset the product configuration).

# **Test Mode**

# **Auto Test**

To have the Maverick Force 3 Profile automatically test all functions one after the other:

- Go to the **Test** main level.
- 2. Select the Auto Test option.

### Manual Test

To manually test an individual function of the Maverick Force 3 Profile:

- 1. Go to the **Test** main level.
- 2. Select the Manual Test option.
- 3. Select a function to test, from Pan, Pan Fine, Tilt, Tilt Fine, P/T Speed, Dimmer, Dimmer Fine, Shutter, Virtual Shaking, Cyan, Magenta, Yellow, CTO, Color, Gobo, Gobo Rotate, Gobo Index, Gobo2, Animation, Animation Rotate, Blade1-1, Blade1-1 Fine, Blade1-2, Blade1-2, Fine, Blade2-1, Blade2-1 Fine, Blade2-2, Blade2-2 Fine, Blade3-1, Blade3-1 Fine, Blade3-2, Blade3-2 Fine, Blade4-1, Blade4-1 Fine, Blade4-2, Blade4-2 Fine, Blade Rotate, Blade. Rota Fine, Focus, Focus Fine, Focus Auto, Zoom, Zoom Fine, Prism, Prism Rotate, Prism2, Prism2 Rotate, Iris, Frost, Frost2, CMY Macro, CMY Macro Speed, or Control.
- 4. Increase or decrease the value of the selected function from 0-255 to test it.

# System Information

The information section of the menu displays statistics and the current status of the product's various functions. To view this information:

- 1. Go to the **Information** main level.
- 2. Select from the **Fixture Information**, **Fan Information**, **Error Information**, or **Channel Information** options.
- 3. Use **<UP>** and **<DOWN>** to view all information.

# **Zero Adjust Mode**

The Zero Adjust mode provides fine adjustments for the home position of every moving part in the optical path as well as the pan and tilt movements. To adjust these options and prevent borders showing or reduction of the light output:

- 1. From the main level screen, press and hold **<MENU>** until the passcode screen appears.
- 2. Enter the passcode: 0920 and press <ENTER>.
- Select the "zero" position to adjust, from PAN, TILT, COLOR, GOBO, GOBO ROTATE, GOBO2, ANIMATION, FOCUS-GOBO, FOCUS-GOBO2, ZOOM, PRISM, PRISM2, PRISM2 ROT, IRIS, FROST, FROST2, CYAN, MAGENTA, YELLOW, CTO, BLADE1- 1, BLADE1- 2, BLADE2- 1, BLADE2- 2, BLADE3- 1, BLADE3- 2, BLADE4- 1, BLADE4- 2, BLADE ROTATE, DIMMER1, DIMMER2, DIMMER3, RDM ID4, RDM ID5, RDM ID6, MAC4, MAC5, or MAC6.
- 4. Adjust the "zero" position for the selected function from 000-255.

# Web Server

The Maverick Force 3 Profile Web Server can be accessed by any computer on the same network as the product. It allows network access to system information, settings such as control setup, manual testing of all functions, firmware updates, and the ability to change the Web Server password.

- 1. Connect the product to power, and set the Control Mode to ArtNet and the IP Mode to Static.
- 2. Connect the product to a Windows computer with a network cable.
- 3. On the computer, set the first value of the IP address of the new network to match the first value of the IP address of the product. The IP address of the product is displayed on the <a href="Home Screen">Home Screen</a>.
- 4. Enter the IP address of the product into the URL bar of a web browser on the computer.
- 5. Enter both the User Name and Password as admin to log in.

### Information

The Information page on the Web Server displays the current settings and the system information of the Maverick Force 3 Profile.

### Setup

The Setup page on the Web Server provides options for control, similar to the **Setup** menu on the product. Click **Save Settings** to send the new configuration to the product.

### Manual Test

The Manual Test page on the Web Server allows all output functions of the product to be controlled through the browser. To set all functions back to default, click **Reset**.

### Firmware Update

The Upgrade page on the Web Server allows the product to be updated with the latest firmware. Go to <a href="https://www.chauvetprofessional.com">https://www.chauvetprofessional.com</a> to download firmware updates.

### Security

The Security page on the Web Server gives the option to change the password to the connected product's web server. Enter the old password (**admin**, by default) and the new password twice, then click **Save Settings** to change the password.

# **Error Codes**

See the table below for error codes and recommended solutions:

| Error Code | Possible Reason           | Potential Solution   |  |
|------------|---------------------------|--|--|
| Page Fond  | Page for 1 error          | Check fan connection   |  |
| Base Fan1  | Base fan 1 error          | Replace fan  |  |
| Base Fan2  | Base fan 2 error          | Check fan connection   |  |
| Dase Fall2 | Dase Idil 2 ellol         | Replace fan  |  |
| Base Fan5  | Base fan 5 error          | Check fan connection   |  |
|            | Dase Iail 5 elloi         | Replace fan  |  |
| Base Fan6  | Base fan 6 error          | Check fan connection   |  |
|            | Baco fair o orion         | Replace fan  |  |
|            |                           | Check module connection  |  |
| BladeR     | Framing shutter error     | Make sure nothing is blocking the movement of the shutters/blade |  |
|            |                           | Do a factory reset   |  |
|            |                           | Update software  |  |
|            |                           | Check module connection  |  |

# 5. Maintenance

# **Product Maintenance**

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean each lighting product at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

- 1. Unplug the product from power.
- 2. Wait until the product is at room temperature.
- 3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
- 4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
- 5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
- 6. Softly drag any dirt or grime to the outside of the transparent surface.
- 7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Do not spin the cooling fans with compressed air. Damage may result.

# **Gobo Maintenance**

To ensure optimal operation: 1) inspect, and 2) clean gobos every four months. More frequent maintenance may be necessary if usage is higher.

To inspect, remove each gobo holder and check if:

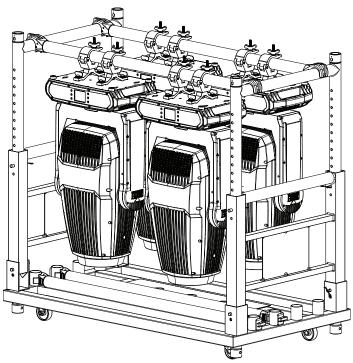

- the holders are clean (free of dirt, grime, or gunk).
- the gobos are properly installed in the holders.
- all the bearings are in place.
- the holders are rotating freely.

To clean the gobos and the gobo holder, follow the instructions below:

- 1. Remove the gobos from the holder.
- 2. Clean the gobos with a soft, lint-free cotton cloth. Use an ammonia-free glass cleaner sprayed to a piece of lint-free cotton cloth to clean glass gobos.
- 3. Submerge the gobo holder (without the gobo installed) in a container with a liquid lubricant (i.e., WD40) and let it rest for a couple of minutes.
- 4. Shake the container with the gobo holder inside to help release/loosen any gunk/grime/dirt.
- 5. Take the gobo holder out of the container and clean it using a small nylon brush.
- 6. Wipe off all the lubricant from the gobo holder using a piece of lint-free cotton cloth.
- Apply a small coat of synthetic oil (i.e., Liquid Bearings) to the bearings and rotate it thoroughly in both directions (needle tip applier recommended). Make sure the gobo holder is rotating freely and is not making any abnormal noise.
- 8. Reinstall the gobos in the gobo holder. Make sure the gobos are in the correct positions.
- 9. Reinstall the gobo holder in the unit.

# **Transporting on Truss or Racks**

When transporting fixtures in pre-rigged truss and transportation racks, mount fixtures in the vertical position with the lenses facing down and the pan and tilt locks engaged. This is to prevent undue stress on the tilt locks and limit the amount of off-axis bounce on internal components.

# 6. Technical Specifications

# **Dimensions and Weight**

| Length            | Width             | Height            | Weight            |
|-------------------|-------------------|-------------------|-------------------|
| 16.73 in (425 mm) | 10.98 in (279 mm) | 30.47 in (774 mm) | 84.2 lb (38.2 kg) |

Note: Dimensions in inches are rounded.

Power

| Power Supply Type    |              | Range                    |              | Voltage Selection |              |
|----------------------|--------------|--------------------------|--------------|-------------------|--------------|
