

COLORADO *SOLO* *EDGE*₁

User Manual

Model ID: COLORADOSOLOEDGE1

Edition Notes

The COLORado Solo Edge 1 User Manual includes a description, safety precautions, installation, programming, operation, and maintenance instructions for the COLORado Solo Edge 1 as of the release date of this edition.

Trademarks

Chauvet, Chauvet Professional, the Chauvet logo, and COLORado, are registered trademarks or trademarks of Chauvet & Sons, LLC (d/b/a Chauvet and Chauvet Lighting) in the United States and other countries. Other company and product names and logos referred to herein may be trademarks of their respective companies.

Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage, or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident, or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision. However, Chauvet has no obligation to make, and does not commit to make, any such revisions.

1. Before You Begin

What Is Included

- COLORado Solo Edge 1
- Seetronic Powerkon IP65 power cable
- Power and Data linking cables
- Stealth filter
- Omega bracket with mounting hardware
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate a claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
<ENTER>	A key to be pressed on the product's control panel

Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Any reference to data or power connections in this manual assumes the use of Seetronic IP-rated cables.

The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

Connection of the control signal: DMX line

- The product has XLR sockets for DMX input and output.
- Notice: This control circuit is isolated and belongs to the Class 2 data port.

The control circuit has a cumulative leakage current of less than 3.5 mA.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

- The luminaire is intended for professional use only.
- The luminaire should be positioned so that prolonged staring into the luminaire at a distance closer than 11.5 ft (3.5 m) is not expected.
- If the external flexible cable or cord of this luminaire is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or its service agent.
- The light source contained in this luminaire shall only be replaced by the manufacturer or its service agent or a similar qualified person.
- **CAUTION:**
 - This product's housing may be hot when operating. Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
 - When transferring the product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow the product to fully acclimate to the surrounding environment before connecting it to power.
 - Flashing light is known to trigger epileptic seizures. User must comply with local laws regarding notification of strobe use.
- **ALWAYS:**
 - Disconnect from power before cleaning the product.
 - When using an IP65-rated product in an outdoor environment, use IP65- (or higher) rated power and data cable.
 - Replace and secure IP-rated protective covers to all power, data, USB, or other ports when not in use.
 - Use a safety cable when mounting this product overhead.
 - Connect this product to a grounded and protected circuit.
- **DO NOT:**
 - Open this product. It contains no user-serviceable parts.
 - Look at the light source when the product is on.
 - Leave any flammable material within 20 cm of this product while operating or connected to power.
 - Connect this product to a dimmer or rheostat.
 - Operate this product if the housing, lenses, or cables appear damaged.
 - Submerge this product (adhere to standards for the published IP rating). Regular outdoor operation is fine.
 - Permanently install outdoors in locations with extreme environmental conditions. This includes, but is not limited to:
 - Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
 - Locations where normal temperatures exceed the temperature ranges in this manual.
 - Locations that are prone to flooding or being buried in snow.
 - Other areas where the product will be subject to extreme radiation or caustic substances.
- ONLY use the carry handle to carry this product.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at higher temperatures.
- The maximum exterior temperature is 158°F (70°C). Do not start the product at higher temperatures.
- The minimum ambient temperature is -5°F (-15°C). Do not operate the product at lower temperatures.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

- In the event of a serious operating problem, stop using immediately.

If this Chauvet product requires service, contact Chauvet Technical Support.

FCC Statement of Compliance

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

Introduction

2. Introduction

Features

- Low-profile, 0.5m IP65 rated footlight with full-color and high-quality white light
- Single-source lens for smooth, even output with no distracting points of light and an additional “stealth” filter to help the fixture disappear when off
- Additional, fully controllable RGB marker lights can be used to cue talent or mark the edge of a stage
- Designed for end-to-end use with no gaps or distracting cable mess, and a covered display to keep everything elegant unseen.

Product Overview

#	Name	#	Name	#	Name
1	Cover release latches	7	Integrated alignment pin	13	Filter release latch
2	Integrated alignment socket	8	Carry handle	14	Ethernet ports (x2)
3	OLED display	9	Safety cable pass-through	15	Barndoors (x4)
4	Menu buttons	10	Angle adjustment screws (x2)	16	DMX in
5	USB-C port	11	Power out	17	Power in
6	Condensation valve	12	DMX out	18	Indicator lights (x6)

Product Dimensions

3. Setup

AC Power

The COLORado Solo Edge 1 has an auto-ranging power supply and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart.

The listed current rating indicates the product's average current draw under normal conditions.

- **Always connect the product to a protected circuit (a circuit breaker or fuse). Ensure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The COLORado Solo Edge 1 comes with a power input cable terminated with a Seetronic Powerkon IP65 connector on one end and an Edison plug on the other end (U.S. market). If the power cable which came with the product has no plug, or if it is necessary to change the plug, use the table below to wire a plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Power Linking

It is possible to power link COLORado Solo Edge 1 products. See the table below for the current draw at each voltage and frequency:

	100 V, 60 Hz	120 V, 60 Hz	208 V, 60 Hz	230 V, 50 Hz	240 V, 50 Hz
Current Draw	1.28 A	1.05 A	.61 A	.55 A	.53 A

Never exceed 12 A on a single circuit. Power-linking cables can be purchased separately.

Signal Connections

The COLORado Solo Edge 1 can receive a DMX, Art-Net™, sACN signal. The product has 2 Seetronic Etherkon-compatible through ports and 5-pin DMX in and out ports. If using other compatible products with this product, it is possible to control each individually with a single controller.

Control Personalities

The COLORado Solo Edge 1 uses a 5-pin DMX data connection, Art-Net™, sACN for its 22 control personalities, ranging from **5Ch** to **21Ch** (1 Cell) and **8Ch** to **37Ch** (2 Cell).

- Refer to the [Operation](#) chapter to learn how to configure the COLORado Solo Edge 1 to work in these personalities.
- The [DMX Channel Assignments and Values](#) section provides detailed information regarding the control personalities.

If the user is not familiar with or need more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

DMX Linking

The COLORado Solo Edge 1 can link to a DMX controller using a 5-pin DMX connection. If using other DMX-compatible products with this product, it's possible to control each individually with a single DMX controller. For more information about DMX, read the DMX primer. Operation at:

https://www.chauvetprofessional.com/wp-content/uploads/2016/06/DMX_Primer.pdf.

Art-Net™ Connection

Art-Net™ is an Ethernet protocol that uses TCP/IP which transfers a large amount of DMX512 data using an ethernet connection over a large network. An Art-Net™ protocol document is available from www.chauvetprofessional.com.

Art-Net™ designed by and copyright Artistic Licence Holdings Ltd.

sACN Connection

Also known as ANSI E1.31, streaming ACN is an Ethernet protocol that uses the layering and formatting of Architecture for Control Networks to transport DMX512 data over IP or any other ACN compatible network.

Ethernet Connection Diagram

Master/Slave Connectivity

The Master/Slave mode allows an COLORado Solo Edge 1 (the master) to control one or more COLORado Solo Edge 1 products (the slaves) without a DMX controller. One COLORado Solo Edge 1 becomes the master when running an auto program or in Static mode.

Each slave's control panel must be configured to operate in Slave mode. During Master/Slave operation, the slaves will operate in unison with the master.

DO NOT connect a DMX controller to products operating in Master/Slave mode. The DMX controller signals may interfere with the signals from the master.

- The [Operation](#) section of this manual provides detailed instructions on how to configure the master and slaves.
- For more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX primer from the Chauvet website: www.chauvetprofessional.com.

USB Software Update

The COLORado Solo Edge 1 allows for software updates with a USB device using the built-in USB port. To update the software using a USB flash drive, do the following:

- Power on the product, and plug the flash drive into the USB port.
- Go to **"Info & Updating"** in the main menu. Press **<ENTER>**.
- Select **"Upgrade Firmware"** from the menu.
- Choose from **Only This Fixture**, **Multiple Fixture**, **Other Fixture Type**, or **Fixture To Fixture**. Press **<ENTER>**.

The **"Other Fixture Type"** option under **Update Firmware** can only be selected for connected products compatible with the Upload 03 (the first 2 digits of the item code must be 03).

- Select the file that needs to be uploaded. The message **"Are you sure?"** will be displayed. Press **<ENTER>**.

If the selected file is incorrect, the upgrade will fail, and the display will go back to the main interface. Repeat steps 1–3 using the correct file.

- If the selected file is correct, the upgrade will start. DO NOT turn off the power or disconnect the USB during the process. USB update can take several minutes to complete.
- When the update is completed, the fixture will automatically reboot.

8. Go to **Information** level of the **Info & Updating** menu and confirm the firmware revision.
9. When the boot-up process is finished, restart the product.

- Place the .chl file in the root directory of the USB drive.
- The product's USB port supports up to 32GB capacity and only works with FAT32 file format.

Turning off the power, removing the USB, or not setting the fixture to the correct protocol during the update can cause partial or total firmware failure in the targeted fixture(s). Please refer to [Force Upload](#) section to fix firmware failure issues.

Fixture To Fixture Software Update

The COLORado Solo Edge 1 allows for a software update through a DMX cable from one COLORado Solo Edge 1 to another. To update the software using a DMX cable connection, follow the instructions below:

1. Power on the products.
2. Connect the DMX out of the COLORado Solo Edge 1 with the latest software to the DMX in of the COLORado Solo Edge 1 that needs to be updated.
3. Go to the **Update Firmware** level of the receiving product's menu.
4. Select the **Fixture To Fixture** option.
5. A warning "**make sure no other signal, Network or DMX controller is being sent! and press enter key to start update**" will show on the display. Press **<ENTER>** to start the update.

- **DO NOT** turn off the power or disconnect the DMX cable during the process. The update can take several minutes to complete.
- **If the connected product is incorrect or has the incorrect software, the upgrade will fail, and the display will go back to the main interface. Repeat steps 1-5 using a COLORado Solo Edge 1 with valid software.**

6. If the connected product is valid, the update will start. DO NOT turn off power or disconnect the DMX cable during the process. The update can take several minutes to complete.
7. When the update is complete, the product will automatically reboot.
8. Go to the **Information** level of the **Info & Updating** menu and confirm the software update.

- **When updating software using Fixture To Fixture, make sure no other DMX signals or Ethernet signals are connected to the products.**
- **Turning off the power, removing the DMX cable, or not setting the fixture to the correct protocol during the update can cause partial or total software failure in the targeted fixture. The user will need an Upload 03 device to fix the software failure issues. Please contact Chauvet customer service for this device.**

Force Upload

A Force Upload is done whenever a software update fails due to accidental removal of the USB flash drive, incorrect control protocol, or loss of power during a regular software update process.

- **A Force Upload process requires a target fixture (the fixture that needs a Force Upload) and a main fixture (the fixture that controls the upload process).**
- **The Force Upload process can only be done one target fixture at a time.**

To do a Force Upload, follow the instructions below:

1. Link the target fixture to the main fixture via a DMX 5-pin connection. Ensure that the target fixture is turned off.
2. Turn on the main fixture and set its protocol to **DMX512**.
3. Plug the flash drive into the USB-C port of the main fixture.
4. Go to Upgrade Firmware on the menu map.
5. Choose between **Multiple Fixture** and **Other Fixture Type**. Press **<ENTER>**.
 - **Multiple Fixture:** Both the target fixture and main fixture are from the same product line (e.g., 2 COLORado Solo Edge 1 fixtures).
 - **Other Fixture Type:** The target fixture and main fixture are from different product series (e.g., a COLORado Solo Edge 1 as the target fixture and a Maverick Silens 2 Profile as the main fixture).
6. Select the file that needs to be uploaded. The message "**Are you sure?**" will appear on the screen. Press **<ENTER>**. Turn on the target fixture within 1–2 seconds of pressing **<ENTER>**. The display on the target fixture should remain off.
 - a. The main fixture will show the update progress (0–100%).

- b. The target fixture's display will turn on, and a notification "<UPDATE>" will appear on the screen.

The timing of when the target fixture's display will turn on varies from fixture to fixture.

7. DO NOT turn off power or remove the USB flash drive. Once the software is done uploading, the target fixture will automatically reboot.
8. Go to the target fixture's main menu and confirm that the firmware version has been updated.
9. Reboot the target fixture.

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the [Safety Notes](#).

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure and attachment points can support the weight before hanging the product (see the [Technical Specifications](#) for weight information).
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power-linking cables to reach.
- Additional 13mm mounting holes allow for secure surface mounting.

Procedure

The COLORado Solo Edge 1 comes with an Omega bracket. The user can directly attach a mounting clamp (sold separately) to this Omega bracket. Make sure the clamp is capable of supporting the weight of this product. For the Chauvet Professional line of mounting clamps, go to <http://www.trusst.com/products>.

Mounting Diagram

Stealth Filter

The COLORado Solo Edge 1 comes with a stealth filter that can be removed. The product keeps the stealth filter in place with a spring-loaded filter release latch. To access the stealth filter slots:

1. Press and hold down the filter release latch.
2. Slide the stealth filter out.
3. Repeat the process to slide the stealth filter back onto the product.
4. Release the filter release latch

Integrated Alignment Stud

The COLORado Solo Edge 1 comes with an integrated alignment stud which insures proper alignment when 2 or more products are mounted horizontally. To access the integrated alignment stud:

1. Pull and hold the locking pin to release the integrated alignment stud. Twist the locking pin clockwise to lock the hardware in place.
2. Pull and twist the locking pin on the second product clockwise to open the socket.
3. Insert the integrated alignment stud into the socket of the second product.
4. Release the locking pin on the second product to lock the integrated alignment stud in place. Failure to do so may result in improper alignment of the products.
5. Repeat steps 1-3 for the remaining products.

Foot Leveling Screws

The COLORado Solo Edge 1 comes with two foot leveling screws at the rear of the unit to allow for better light adjustment on non-leveled surfaces.

1. Rotate the foot leveling screw clock-wise (or counter clockwise) to raise or lower the rear foot of the product.
2. Once the desired level is reached, the foot will remain in place until the foot leveling screw is rotated counter clockwise.
3. Repeat steps 1 - 2 with the second foot leveling screw to ensure the evenness of the product.

4. Operation

Control Panel Description

Button	Name	Function
	<Menu>	Exits the current menu or function
	<Enter>	Enables the currently displayed menu or sets a selected value into a function
	<Up>	Navigates upwards through the menu or increases the numeric value of a function
	<Down>	Navigates downwards through the menu or decreases the numeric value of a function
	<Focus Mode>	Activates or deactivates Focus Mode: full output power for easy focusing. Does not change other settings.

Control Options

Set the COLORado Solo Edge 1 starting address in the **001-472** DMX range. This enables control of up to 13 products in the 10-channel **37 Ch (2 Cell)** personality.

Programming

Refer to the menu map to understand the menu options. The menu map shows the main menu and a variable number of programming levels for each option.

- To access the main menu, press **<MENU>**.
- To navigate to the desired option in the main menu, press **<MENU>** repeatedly until the option is indicated, or use **<UP>** or **<DOWN>** to navigate directly.
- Press **<ENTER>** to select the indicated option.
- Use **<UP>** or **<DOWN>** to navigate within a programming level until the desired option is indicated.
- To return to the main menu, press **<MENU>** repeatedly until it shows on the display.
- Press and hold **<MENU>** to return to the home screen.

Control options can also be accessed through the [Web Server](#).

Battery Powered Display

The COLORado Solo Edge 1 has a battery powered display which enables access to the menu when the product is powered off. Press and hold **<MENU>** until the display activates (approximately 15 seconds).

Home Screen

The COLORado Solo Edge 1 has a home screen that shows the current control protocols, personalities, starting addresses, IP addresses, and universes. To see the home screen, press **<MENU>** repeatedly until it shows on the display. From the home screen, press **<ENTER>** to reach the main menu.

Control Panel Lock

The setting locks or unlocks the control panel.

1. Go to the **Other Settings** main level.
2. Select the **Key Lock** option.
3. Select **NO** (control panel stays unlocked) or **YES** (locks control panel).

When the control panel lock is activated, the product will prompt for the passcode in order to access the menu. Enter the passcode as described below.

Passcode

After being prompted to enter the passcode, enter **<UP>**, **<DOWN>**, **<UP>**, **<DOWN>**, **<ENTER>**.

Menu Map

Refer to the COLORado Solo Edge 1 product page on www.chauvetprofessional.com for the latest menu map.

Factory Reset	No				Resets the product to factory default settings
	Yes				

Control Configuration

Use control configurations to operate the product with a DMX, Art-Net, or sACN controller.

Control Mode

The COLORado Solo Edge 1 works with DMX, Art-Net™, and sACN control signals. To select the protocol:

1. Go to the **Protocol** main level.
2. Select the desired protocol, from **DMX512**, **ArtNet**, or **sACN**.

See the [Ethernet Settings](#) section for further setup of ethernet protocols (Art-Net™ or sACN).

Control Personalities

To set the DMX personality:

1. Go to the **Personality** main level.
2. Select from **1 Cell**, or **2 Cell**.
3. Select the personality from the table below.

1 Cell	2 Cell
CCT 6ch	CCT 9ch
HSV 6ch	HSV 9ch
RGB 5ch	RGB 8ch
RGBW 6ch	RGBW 10ch
RGBWL 7ch	RGBWL 12ch
RGBWL 16-bit 12ch	RGBWL 16-bit 22ch
RGB Ext. 12ch	RGB Ext. 19ch
RGBW Ext. 13ch	RGBW Ext. 21ch
RGBWL Ext. 14ch	RGBWL Ext. 23ch
RGBWL Full 21ch	RGBWL Full 37ch
XY 6ch	
XY Ext. 11ch	

- See the [Starting Address](#) section for the highest selectable starting address for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Starting Address

Each product will respond to a unique starting address from the controller. All products with the same starting address will respond in unison. To set the starting address in DMX mode:

1. Go to the **DMX Address** main level.
2. Select the starting address (**001–507**).

	Personality	Highest Address	Products per Universe
1 Cell	CCT 6ch	507	85
	HSV 6ch	507	85
	RGB 5ch	508	102
	RGBW 6ch	507	85
	RGBWL 7ch	506	73
	RGBWL 16-bit 12ch	501	42
	RGB Ext. 12ch	501	42
	RGBW Ext. 13ch	500	39
	RGBWL Ext. 14ch	499	36
	RGBWL Full 21ch	492	24
	XY 6ch	507	85
	XY Ext. 11ch	502	46

	Personality	Highest Address	Products per Universe
2 Cell	CCT 9ch	504	57
	HSV 9ch	504	57
	RGB 8ch	505	64
	RGBW 10ch	504	51
	RGBWL 12ch	501	42
	RGBWL 16-bit 22ch	491	23
	RGB Ext. 19ch	494	27
	RGBW Ext. 21ch	492	24
	RGBWL Ext. 23ch	490	22
	RGBWL Full 37ch	476	13

Ethernet Settings

The Ethernet Settings control the universe, start address (Art-Net™ or sACN), IP address, and ethernet conversion functions of the product.

IP Mode

It is possible to set the IP address of the COLORado Solo Edge 1 manually, by the network, or to a preset static address specific to each product. To set the IP mode, follow the instructions below:

1. Go to the **Ethernet Setting** main level.
2. Select the **IP Mode** option.

Select the desired IP mode, from **Manual** (set the IP address with the control panel), **DHCP** (the network sets the IP address), or **Static** (a preset address specific to each product).

Universe

To assign an Art-Net™ or sACN universe to the COLORado Solo Edge 1:

1. Go to the **Ethernet Setting** main level.
2. Select the **Universe** option.
3. Set the universe, from **00000–32769** (for Art-Net™) or from **00001–31999** (for sACN).

IP Address

To set the IP address:

1. Go to the **Ethernet Setting** main level.
2. Select the **IP Address** option.
3. Set the first value of the IP address from **000–255**.
4. Press **<ENTER>** to cycle through the 4 values of the IP address.
5. Set the other 3 values from **000–255**.
6. Press **<MENU>** to exit when the IP address is set as desired.

Subnet Mask

To set the subnet mask:

1. Go to the **Ethernet Setting** main level.
2. Select the **Subnet Mask** option.
3. Set the first value of the IP address from **000–255**.
4. Press **<ENTER>** to cycle through the 4 values of the IP address.
5. Set the other 3 values from **000–255**.
6. Press **<MENU>** to exit when the IP address is set as desired.

Ethernet to DMX

When Ethernet to DMX is active, the selected universe of the Art-Net™ or sACN signal will be converted to DMX and output through the 5-pin DMX out port.

1. Go to the **Ethernet Setting** main level.
2. Select the **Ethernet To DMX** option.
3. Select from **No** (do not convert) or **Yes** (convert).

Virtual Color Wheel

The COLORado Solo Edge 1 includes a feature called the Virtual Color Wheel (VCW). This feature is available as a standalone control mode for manual use and as a control channel in select DMX personalities. More than 30 premixed colors, custom blended by Chauvet engineers, are available to call up for easier programming.

The DMX values used to mix these colors are provided below. The overall intensity of the Ovation fixture can be adjusted to more closely replicate familiar industry-standard colors. A chart is available at www.chauvetprofessional.com to compare Chauvet's premixed colors with popular gel colors. This chart is for comparison purposes only and is not an assertion that Chauvet's premixed colors match any of the gel colors listed.

Standalone Configuration

Static Mode

The static mode options under **Virtual Color Wheel** also include preset color temperatures, manual color mixer, and cross-fade speed.

Fixed Colors

To select a fixed color:

1. Go to the **Static** main level.
2. Select the **Fixed Colors** option.
3. Select the desired color combination, from **Red**, **Green**, **Blue**, **Warm White**, **Lime**, **RB** (Red and blue), **GB** (Green and blue), **RG** (Red and green), **RGB** (Red, green, and blue), **RGBWw** (Red, green, blue, and warm white), **RGBL** (Red, green, blue, and lime), or **RGBWwL** (Red, green, blue, warm white, and lime).
4. Set the **Dimmer** value (**000–255**).

Manual Color Mixer

To manually mix a custom static color:

1. Go to the **Static** main level.
2. Select the **Manual Color Mixer** option.
3. Select the color to edit (**Red**, **Green**, **Blue**, **Warm White**, or **Lime**).
4. Set the value for the selected color (**000–255**).
5. Repeat steps 3 and 4 until product outputs as desired.

Color Temperature

To select a preset color temperature:

1. Go to the **Static** main level.
2. Select the **Color Temperature** option.
3. Select the desired color temperature, from **2800K**, **3000K**, **3200K**, **3500K**, **4000K**, **4500K**, **5000K**, **5600K**, **6000K**, **6500K**, **7000K**, **7500K**, or **8000K**.
4. Set the **Dimmer** value (**000–255**).

Auto Show

To select an automatic program:

1. Go to the **Static** main level.
2. Select the **Auto Show** option.
3. Select the desired auto program (**Auto 1–3**).
4. Set the **Speed** value (**001–100**).

Virtual Color Wheel

To select from the Virtual Color Wheel:

1. Go to the **Static** main level.
2. Select the **Virtual Color Wheel** option.
3. Select the desired virtual gel color (see the [Virtual Color Wheel Chart](#)).
4. Set the **Dimmer** value (**0–255**).

Color X-Fade Speed

The Color X-Fade Speed option creates a fade transition between colors when using colors in the Virtual Color Wheel or the Color Temperature chart.

1. Go to the **Static** main level.
2. Select the **Color X-Fade Speed** option.
3. Select **Off** (to turn off the fade transition between colors) or **X-Fade Speed 1–4** (from fast to slow).

Settings Configuration

Master/Slave

To set the COLORado Solo Edge 1 product to master or slave mode:

1. Go to the **Master/Slave** main level.
2. Select from **Master** (sends control signal) or **Slave** (receives control signal).

- **Configure all the slave products before connecting the master to the daisy chain.**
- **Never connect a DMX controller to a DMX string configured for Master/Slave operation because the controller may interfere with the signals from the master.**
- **Do not connect more than 31 slaves to the master.**

Other Settings

Cell Order

To set the order of the cells:

1. Go to the **Other Settings** main level.
2. Select the **Cell Order** option.
3. Select from **1 > 2** or **2 > 1**.

Operation

Color Calibration

To configure the color calibration:

1. Go to the **Other Settings** main level.
2. Select the **Color Calibration** option.
3. Select from **Off**, **User Calibration**, or **Factory Calibration**.
4. If **User Calibration** is select, choose the maximum color value to edit, from **Red**, **Green**, **Blue**, **Warm White**, or **Lime**.
5. Set the maximum level for the selected color, from **125–255**.
6. Repeat until the colors are calibrated as desired.

Red Shift

With red shift enabled, the color temperature will warm as the dimmer decreases in imitation of a lamp. To enable or disable the red shift function:

1. Go to the **Other Settings** main level.
2. Select the **Red Shift** option.
3. Select from **On** or **Off**.

Dimmer Curve

To set the dimmer curve:

1. Go to the **Other Settings** main level.
2. Select the **Dimmer Curve** option.
3. Select from **S-Curve**, **Linear**, **Square**, or **Inverse Square**.

Dimmer Speed Mode

To set the dimmer speed:

1. Go to the **Other Settings** main level.
2. Select the **Dimmer Mode** option.
3. Select the dimmer speed mode from **Off** (instant), **Dimmer 1** (fastest), **Dimmer 2**, or **Dimmer 3** (slowest).

Display Backlight

To set how long the display will stay lit without activity:

1. Go to the **Other Settings** main level.
2. Select the **Back Light** option.
3. Select from **10S** (10 seconds), **30S** (30 seconds), **2Min** (2 minutes), or **Always On**.

Display Invert

To invert the display:

1. Go to the **Other Settings** main level.
2. Select the **Display Invert** option.
3. Select from **No** (does not invert the display), or **Yes** (inverts the display).

Pulse Width Modulation

To set the frequency of the pulse width modulation:

1. Go to the **Other Settings** main level.
2. Select the **LED Frequency** option.
3. Select the PWM frequency, from **1000Hz**, **2000Hz**, **4000Hz**, **6000Hz**, or **25KHz** or **64KHz**.

Power Steady Mode

To maintain a steady LED output during prolonged periods:

1. Go to the **Other Settings** main level.
2. Select **On** (activates mode) or **Off** (deactivates mode).

Info & Updating

Information

To view product information, such as the number of hours the product has been on, the driver firmware, etc.:

1. Go to the **Info & Updating** main level.
2. Select the **Information** option.

Temperature

To view the temperatures of the display board and the LEDs in °C:

1. Go to the **Info & Updating** main level.
2. Select the **Temperature** option.

Clock Setting

To set the date and time on the internal clock:

1. Go to the **Info & Updating** main level.
2. Select the **Clock Setting** option.
3. Enter the year (**2000–2099**), month (**01–12**), day (**01–31**), hour (**00–24**), minute (**01–59**), and second (**01–59**).
4. Confirm **Save&ESC** to complete.

Current Time

To view the current date and time as set by the internal clock:

1. Go to the **Info & Updating** main level.
2. Select the **Current Time** option.

Factory Reset

To reset the product to factory default settings:

1. Go to the **Factory Reset** main level.
2. Select **No** (do not reset) or **Yes** (reset).

Web Server

The COLORado Solo Edge 1 Web Server can be accessed by any computer on the same network as the product. It allows network access to system information, settings such as control protocol and starting address, color output testing, and the ability to change the Web Server password.

1. Connect the product to a Windows computer with a network cable.
2. On the computer, set the IP address of the new network to have the same first 3 digits as the IP address of the product (See [IP Address](#)).
3. Enter the IP address of the product into the URL bar of a web browser on the computer.
4. Enter both the User Name and Password as **admin** to log in.

Home

The Web Server Home page displays the details of all available control personalities and the technical specifications for the COLORado Solo Edge 1.

Settings

The Web Server Settings page provides options for control. From the drop-down menus, the Protocol, Universe, Start Address, IP Address, Ethernet to DMX, Personality, Dimmer Curve, Dimmer Mode, and PWM Frequency can all be edited. Click **Save Settings** to send the new configuration to the product.

Output

On the Web Server Output page, an output test of the product's LEDs can be performed, by either editing the values of each LED manually (by typing the number or moving the fader), or by selecting a sample color. The page will show the current output color on the bottom left.

Security

The Web Server Security page gives the option to change the password to the connected product's web server. Enter the old password (**admin**, by default) and the new password twice, then click **Save Settings** to change the password.

5. Maintenance

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean each lighting product at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Torque Measurements

To maintain the IP rating when reassembling the product, use the given torque measurements for each of the following screws and bolts:

Fixture Parts	Torque Rating (Kgf.cm)	Torque Rating (lbf.in)
Rear cover	9	7.81
Battery box cover	10	8.68
Glass plate	8.5	7.38
Barn door	10	8.68
LED standoff	4.8	4.17

Vacuum Test Measurements

Use the IP Tester from Chauvet Professional to ensure the product has been reassembled correctly by following the information below:

Parameters	Values
Method	Positive
Test pressure	40 kPa
Test duration	40 seconds
PASS state leak pressure	0.5kPa

6. Technical Specifications
