

Amhaze Studio

The Amhaze Studio is a professional haze machine that creates atmospheric effects for noise-sensitive environments, featuring a large-capacity tank, rapid heat-up, and a high-volume output.

With its robust construction and integrated road case, it is ideal for any scale of production, including touring, theatrical, and broadcast applications where quiet operation is essential.

- Engineered for whisper-quiet operation in noise-sensitive broadcast and theatrical settings.
- Delivers a powerful haze output of up to 1,700 cubic feet per minute.
- Reaches full operational temperature in just four minutes for rapid deployment.
- Features a large 3.2-liter fluid tank for extended, uninterrupted operation.
- Equipped with industry-standard power and data connectors for seamless integration.
- Built into a rugged road case for maximum durability and portability on tour.
