

ArKaos Media Master Express

ArKaos MediaMaster Express is an intuitive media server software that provides high-performance video management, playback, and pixel mapping for displays and lighting fixtures using Art-Net and Kling-Net protocols.

This software is ideal for live events, houses of worship, clubs, and corporate presentations requiring a simple yet powerful solution for integrating video content across screens and lighting rigs.

- Supports versatile control options including DMX, Art-Net, MA-net, and MIDI.
- Layer up to eight independent HD or SD video sources for dynamic visual compositions.
- Includes a 4.7 GB content library with visuals, text layers, and audio visualizations.
- Accepts a wide range of popular video formats and live inputs via PCI, FireWire, or USB.
- Delivers high-performance playback by leveraging a multi-threaded engine on multi-core machines.
- Enhance visuals with an extensive library of over 60 built-in, real-time video effects.
