

CT-APP

The CT-APP is an adjustable clamp system designed to create a secure, high-capacity hang point on box truss for supporting video walls.

Perfect for live production environments such as concerts, corporate events, and trade shows where video walls must be safely and securely rigged to a truss structure.

- Adjusts to fit box truss with 2-inch chords up to 20.5 inches square.
- Provides a versatile hang point for equipment anywhere along the length of a truss.
- Built with 360-degree wrap-around aluminum couplers to protect truss from scratches or damage.
- Features an integrated, rated eye bolt for simple shackle connections up to 5/8 inch.
- Constructed from 6061 T-6 aluminum and graded steel for long-lasting, reliable performance.
- Offers a black anodized finish for a discreet, professional look in any rig.
