

DMX3F5M

A complete line of professional DMX cables, offered in three- and five-pin configurations and various lengths, are manufactured to stringent standards for safe, shielded, and interference-free signal transmission for lighting fixtures. Ideal for reliably interconnecting any DMX-enabled lighting fixtures in applications ranging from mobile entertainment to large-scale productions and permanent installations.

- Connects 3-pin female DMX outputs to fixtures requiring a 5-pin male input.
- Maintains optimal signal integrity for precise, uninterrupted DMX communication.
- Built with robust, high-quality components for dependable performance in demanding environments.
- A vital tool for integrating mixed DMX inventories in rental or production settings.
- Meets all DMX-512A specifications for guaranteed compatibility and safe operation.
- Offers a compact, reliable solution for overcoming DMX connector mismatches on site.
