

## DMX5F3M

A professional line of DMX cables in various lengths with three- and five-pin connectors, specifically engineered for lighting to provide safety, shielding, and prevent transmission interference.

Ideal for connecting DMX-controlled lighting fixtures in any professional production, event, or permanent installation where reliable and clean signal transmission is critical.

- Adapts 5-pin DMX connections for use with 3-pin DMX lighting equipment.
- Features high-quality 5-pin female and 3-pin male DMX connectors.
- Engineered with a rugged, compact housing for dependable field use.
- Maintains DMX signal integrity and prevents data transmission interference.
- An essential tool for ensuring compatibility in mixed-equipment lighting rigs.
- Guarantees correct DMX512 pin-out for reliable fixture communication.
