

## F3

The F3 is a versatile 3.9 mm pitch LED video panel with Novastar control, featuring full front and rear serviceability and magnetic modules for simple setup and maintenance. This panel is equally suited for both the rental market and permanent installations, especially in applications requiring direct wall mounting and convenient service access.

- Features high-quality black body LEDs with 14-bit grayscale for superior image depth.
- Delivers a flicker-free image with a 3840 Hz refresh rate, ideal for on-camera use.
- Housed in lightweight die-cast magnesium, allowing safe vertical hangs of up to 22 panels.
- Includes dual, redundant power supplies to ensure maximum system stability and reliability.
- Intelligent LED modules store calibration data, ensuring consistent color uniformity across panels.
- Offers optional curving hardware to create unique concave or convex display configurations.
