

F3X

A high-resolution, 3.9mm indoor-rated LED video panel in a convenient 1000mm by 500mm form factor, engineered with high-performance drivers and 14-bit grayscale to deliver exceptionally clear and vibrant imagery.

Its high-resolution display is perfectly suited for close-viewing indoor applications including corporate events, trade shows, broadcast studios, and permanent installations.

- Driven by the industry-standard Novastar control protocol for easy content configuration.
- Delivers a high 3840 Hz refresh rate for flicker-free, on-camera performance.
- Utilizes high-quality black body LEDs to reproduce video with exceptional color and contrast.
- Features magnetic, intelligent modules with front and rear access for simplified maintenance.
- A lightweight, die-cast magnesium housing enables versatile hanging, stacking, or wall mounting.
- Integrated dual power supplies provide system redundancy for increased operational stability.
