

F4IP

The F4IP is a high-performance, IP65 outdoor-rated video panel featuring a 4.8 mm pixel pitch, high-contrast 5,500 NITS brightness, and front/rear serviceable magnetic modules for delivering vivid video images.

Ideal for touring productions, festivals, and large-scale events that require a bright, weather-resistant, and quick-to-deploy video solution for both indoor and outdoor use.

- Integrates with the VIP Drive 43Nova using the Novastar control protocol.
- Features black body LEDs for high-contrast video and superior image reproduction.
- Improves on-camera performance with specialized S-PWM dimming for broadcast.
- Housed in a lightweight magnesium die-cast frame for simplified transport and rigging.
- Ensures maximum uptime and display stability with redundant power supplies.
- Simplifies maintenance with intelligent, memory-equipped, and hot-swappable modules.
