

## F4XIP

The F4XIP is a high-performance, IP65 outdoor-rated video panel featuring brilliant 5,000-NIT brightness and a 3,840 Hz refresh rate for exceptional on-camera performance, all housed in a lightweight, magnetic die-cast frame for easy setup and service.

Perfect for touring productions, outdoor festivals, and broadcast applications requiring vivid, high-brightness video that performs flawlessly on camera in any lighting condition, including direct daylight.

- Features a 4.8 mm pixel pitch in a versatile 1000 x 500 mm form factor.
- High-quality black body LEDs reproduce video with exceptional 14-bit grayscale depth.
- Operates on the industry-standard Novastar control protocol for seamless system integration.
- Intelligent modules offer fast front or rear serviceability and store calibration data.
- Lightweight magnesium housing allows for safe vertical hanging of up to 23 panels.
- Dual, redundant power supplies increase system stability for mission-critical applications.
