

## High Performance Haze Fluid (HF5)

CHAUVET High Performance Haze Fluid HF5 is a nontoxic, nonflammable, and unscented formula that generates a thin mist of haze without staining or leaving behind residue.

Formulated specifically for use within the Amhaze line of machines, this fluid is ideal for creating a consistent, light-enhancing atmosphere for professional productions, stages, and events.

- Produces a fine, evenly dispersed haze with superior hang time.
- Optimizes output and machine longevity when used with Amhaze series hazers.
- Features a water-based, nontoxic, and nonflammable composition for safe operation.
- Protects sensitive equipment and venue surfaces from residue buildup or staining.
- Formulated to be unscented, maintaining a neutral atmosphere for any performance.
- Provides the ideal atmospheric density for enhancing aerial and wash lighting effects.
