

IP5SIG Signal Extension

A 16.5-foot, IP66-rated, 3-pin data extension cable with locking connectors designed to provide a secure and weather-resistant signal link.

Perfect for outdoor productions, architectural installations, or any temporary setup where protection from dust and water is critical.

- Maintains signal integrity while extending data runs by 16.5 ft (5 m).
- Features an IP66-rated housing to protect data integrity in any weather condition.
- Equipped with secure locking 3-pin connectors to prevent accidental disconnection.
- Engineered with a rugged, heavy-duty jacket for reliable performance on the road.
- Ensures a stable and reliable data link between compatible IP-rated fixtures.
- Provides a simple, effective solution for bridging gaps in your lighting rig.
