

IP Flex Extension

A 3-pin, IP67-rated extension cable featuring secure locking connectors, available in various lengths to reliably extend power or data connections.

Ideal for outdoor event production, architectural installations, or any environment where connections must be protected from dust and water.

- Delivers superior weather protection with an IP67 rating for reliable performance in any environment.
- Ensures stable power and data transmission with robust 3-pin locking connectors.
- Combines power and data into a single cable to streamline complex lighting setups.
- Engineered for seamless integration with the CHAUVET Professional ÉPIX Flex series.
- Available in four lengths to provide versatile solutions for system design and layout.
- Extends system reach without signal degradation, ensuring consistent fixture performance.
