

Low-Lying Fog Fluid (LLF5)

LLF5 is a non-toxic, water-based formula that produces a thick, ground-hugging cloud of low-lying fog that leaves no residue.

Specially crafted for use in the Cloud 9 low-lying fog machine, this fluid creates continuous, floor-hugging cloud effects.

- Engineered to maximize the output and efficiency of the Cloud 9 machine.
- Delivers a thick, uniform ground fog for dramatic, low-lying effects.
- Meets high safety standards with its non-toxic, non-flammable formula.
- Ensures a clean production environment by leaving no residue or stains.
- Provides an unscented formula suitable for all venues and audiences.
- Utilizes a high-quality water-based fluid for reliable, consistent results.
