

Net-X II

A versatile rack-mountable Ethernet-to-DMX node and merger that converts Art-Net or sACN to eight individually assignable DMX outputs and supports DMX preset recording. Perfect for creating a reliable and highly customizable network infrastructure for complex lighting control systems in touring, production, and installation environments.

- Features two 5-pin DMX inputs and eight optically isolated 5-pin DMX outputs.
- Converts up to eight DMX universes into Art-Net or sACN network protocols.
- Merges two controllers using HTP or LTP protocols for flexible signal management.
- Records up to 10 DMX presets for standalone playback or remote contact triggering.
- Supports RDM over Art-Net for simplified remote fixture configuration and management.
- Includes an integrated webserver for remote setup, system backup, and firmware updates.
