

onAir Panel 1 IP 60° Honeycomb

A light control grid accessory designed to attach to a light source, uniformly narrowing its beam spread and eliminating unwanted spill. Perfect for studio photography and videography where precise, focused light is needed to isolate a subject or create dramatic effects.

- Narrows the fixture's beam spread to a precise 60° field angle.
- Controls peripheral light spill to reduce unwanted lens flare and glare.
- Delivers soft, directional illumination ideal for key and fill light applications.
- Custom-designed for a secure, seamless fit with the onAir Panel 1 IP.
- Built with a lightweight yet durable frame for easy handling and transport.
- Allows for quick, tool-free installation and removal from the fixture.
