

## onAir Panel 2 IP 30° Honeycomb

A honeycomb grid accessory designed to control light spill by uniformly narrowing the beam spread for more focused, directional illumination.

Perfect for studio photography and videography where precise control is needed to create dramatic portraits, accent a subject, or prevent light from hitting the background.

- Narrows the native beam angle to a focused 30° field.
- Designed exclusively for a seamless fit with the onAir Panel 2 IP.
- Eliminates unwanted light spill for cleaner, more directed output.
- Creates a high-contrast look by isolating subjects from the background.
- Ideal for key or accent lighting in broadcast and film applications.
- Attaches quickly and securely to the fixture for efficient workflow.
