

onAir Panel Min IP 30° Honeycomb

A light control accessory designed to narrow the beam spread, eliminate unwanted light spill, and create a more focused, directional output.

Ideal for studio photography and filmmaking applications where precise light containment on a subject is required.

- Delivers a uniform 30° beam angle for focused and controlled light output.
- Controls unwanted light spill and glare for precise subject illumination.
- Custom-designed for a secure and seamless fit on the onAir Panel Min IP.
- Provides the precise light containment essential for broadcast and film production.
- Rigid honeycomb structure directs light forward with minimal diffusion.
- Lightweight construction allows for quick, tool-free installation and removal.
