

onAir Panel Min IP 60° Honeycomb

A honeycomb grid accessory that attaches to a light source to control unwanted spill and uniformly narrow the beam spread for more precise illumination. Ideal for studio photography and filmmaking applications where focused light is required to highlight a subject and create dramatic contrast.

- Narrows the beam spread to a precise 60° for focused subject illumination.
- Minimizes peripheral light spill to create dramatic contrast and reduce unwanted glare.
- Designed exclusively for the onAir Panel Min IP, ensuring a secure and precise fit.
- Ideal for broadcast, film, and studio applications requiring controlled, directional light.
- Features a lightweight yet rugged design for reliable performance in any environment.
- Installs quickly and securely, allowing for rapid changes to the lighting setup.
