

onAir Panel 1 IP Heavy Diffusion Filter

The onAir Heavy Diffusion filter is an interchangeable accessory for onAir Panel lights designed to produce a less intense beam with softer shadows. This filter is ideal for creating soft, flattering light in controlled studio environments for interviews, portraiture, or cinematic applications.

- Produces a highly diffused, soft-edged beam for flattering key or fill lighting.
- Ideal for broadcast, film, and studio applications requiring pristine soft light.
- Creates the softest shadows and most gentle light fall-off in the onAir filter series.
- Designed for quick, tool-free installation on the onAir Panel 1 IP fixture.
- Significantly reduces beam intensity for controlled, low-light environments.
- Enhances skin tones for polished, professional on-camera appearances.
