

## onAir Panel 1 IP Light Diffusion Filter

The onAir Light Diffusion filter is an interchangeable accessory for onAir Panel models that produces a more intense beam with stronger, more defined shadows. This filter is ideal for applications requiring dramatic, high-contrast lighting effects or for simulating the hard, direct look of sunlight.

- Functions as an easily interchangeable filter for onAir Panel models.
- Produces a concentrated beam with increased intensity and throw.
- Creates stronger, more defined shadows for high-contrast visual designs.
- Ideal for simulating the hard, direct lighting of natural sunlight.
- A valuable tool for sculpting bold key, fill, or effect lighting.
- Modifies the standard soft output to a harder, more direct source.
