

onAir Panel 2 IP Heavy Diffusion Filter

The onAir Heavy Diffusion filter is an interchangeable accessory for onAir Panel lights that produces a less intense beam with softer shadows.

It is perfectly suited for applications requiring gentle, flattering illumination, such as interviews and portraiture where harsh lighting is undesirable.

- Engineered to produce an extremely soft beam with minimal hard-edged shadows.
- Reduces specular highlights and glare for a clean, professional on-camera look.
- Designed for quick, tool-free installation on onAir Panel 2 IP fixtures.
- Provides the highest level of diffusion for the softest possible light output.
- Creates a gentle, wrap-around light ideal for key and fill applications.
- Maintains high color fidelity and consistency from the fixture's light engine.
