

onAir Panel 2 IP Medium Diffusion Filter

The Medium Diffusion filter is an interchangeable accessory for onAir Panel models that provides nuanced diffusion to achieve optimal light output and beam quality. It is the ideal standard choice for professional studio applications requiring a perfect balance between soft, high-quality light and efficient beam output.

- Provides medium diffusion to soften and shape the light beam.
- Designed as an interchangeable accessory for onAir Panel 2 IP fixtures.
- Balances beam softness with high-efficiency light output for optimal performance.
- Creates a smooth, even field of light ideal for studio and broadcast.
- Engineered for quick and secure installation on compatible panel fixtures.
- Delivers nuanced beam control for professional-grade lighting applications.
