

onAir Panel Min IP Barndoor

A light control accessory designed to shield excess light from spilling onto the stage and surrounding architectural elements.

Perfect for theatrical, broadcast, and architectural applications where precise beam focus and the elimination of glare are required.

- Provides precise control over light spill and unwanted glare.
- Designed for seamless integration with the onAir Panel Min IP.
- Essential for broadcast applications to eliminate lens flare and off-axis spill.
- Shapes light with accuracy for theatrical and architectural installations.
- Features a durable, all-metal construction for reliable, long-term use.
- Allows for quick, simple adjustments to the beam shape.
