

PVP Rig Kit

A specialized rigging kit designed for securely hanging PVP panels from truss or pipe, featuring adjustable connectors to ensure perfect pixel alignment.

This kit is essential for any mobile production or permanent installation where video walls must be flown from overhead support structures.

- Provides a dedicated rigging solution for CHAUVET Professional PVP S-series and C6 panels.
- Attaches securely to standard 2-inch truss and pipe with an included half-coupler clamp.
- Supports substantial vertical arrays with a maximum load capacity of 440 lbs (200 kg).
- Simplifies the process of flying video walls for productions and permanent installations.
- Built with rugged components for reliable performance and enhanced operational safety.
- Offers a complete, all-in-one kit for hanging compatible PVP video panel systems.
