

RB-F50CM

A dedicated rigging bar designed to easily and securely hang CHAUVET Professional F-Series video panels from truss or pipe.

Perfectly suited for touring productions, corporate events, or any installation requiring fast and reliable rigging of video walls onto a trussing structure.

- Designed exclusively for seamless integration with CHAUVET Professional F-Series video panels.
- Built to support a maximum load capacity of 650 pounds (295 kilograms).
- Offers flexible panel orientation for vertical or horizontal video wall configurations.
- Interlocking hardware ensures precise alignment when connecting multiple rigging bars.
- Includes M20 eyebolts for straightforward integration with standard rigging hardware.
- Provides the flexibility to replace included eyebolts with preferred mounting hardware.
