

REM Mira Power Cable 10m

A 10-meter (32.8 ft.) power cable from the REM Mira series featuring a bare-ended termination for custom electrical connections.

Ideal for professional installers and technicians needing to directly wire equipment in theatrical, architectural, or permanent installation settings.

- Provides an extended 10-meter (32.8 ft.) length for flexible placement of video panels.
- Features a bare-ended termination for direct, hard-wired connections in permanent installs.
- Engineered exclusively as the dedicated power solution for REM Mira series screens.
- Enables seamless electrical integration within permanent architectural and theatrical designs.
- Constructed with durable, professional-grade components for reliable long-term operation.
- Gives technicians the freedom to create custom power solutions on site.
