

SC-08 Safety Cable

A black-finished steel safety cable with a carabiner, engineered to securely anchor production fixtures, prevent falls, and meet venue safety requirements. Ideal for any production, event, or installation where overhead equipment must be safely secured within a rigging structure.

- Built with durable steel aircraft cable for reliable fixture support.
- Provides a safe working load of 75 kg (165 lbs) for diverse fixtures.
- Features an integrated carabiner for quick and direct attachment to equipment.
- Engineered to help meet the safety requirements of most production venues.
- Finished in black to maintain low visibility and blend into the rig.
- Delivers an essential secondary safety measure to prevent equipment from falling.
