

UPLOAD 08

A USB-connectable hardware and software system designed for uploading firmware updates to Maverick and Rogue moving heads.

Essential for rental houses, service technicians, and venues needing to efficiently maintain the software on their inventory of compatible lighting fixtures.

- Streamlines firmware updates for Maverick and Rogue series moving head fixtures.
- USB-powered hardware eliminates the need for an external power supply.
- Designed exclusively for updating fixtures within the Maverick and Rogue series.
- Updates up to 12 DMX-linked fixtures simultaneously from a single device.
- An essential tool for technicians and rental houses to maintain fixture inventory.
- Includes a dedicated PC application for intuitive control of the update process.
